

Wake up America!

What Really Happened on 9/11?

David W. Allan

As of December 25th, 2019, three thousand two hundred and thirty-one architects and engineers have signed a petition "...calling for a new investigation of the World Trade Centers' destruction." <https://www.ae911truth.org/> They have done an outstanding job of writing peer reviewed papers and books documenting their findings. Their excellent work has been used by a "Lawyers Committee for 9/11," <https://www.lawyerscommitteefor9-11inquiry.org/> to petition NY Attorney General, who is required by law to hold a Grand Jury.

The far reaching and profound evidence provided by the architects and engineers for the Lawyers Committee totally convinced them that controlled demolition brought down the three buildings, and that it was impossible for the three towers to fall from the impact of the airplanes and internal fires. That Grand Jury is secret and is in process now. We do not know what the Grand Jury will do with the evidence, but we can hope and pray that the jury members have integrity that the justice system in this country can work in a good direction – a critical direction given this most egregious crime ever committed on the American people on 9/11 eighteen years ago in 2001. <https://www.ae911truth.org/evidence/technical-articles/articles-by-ae911truth/439-lack-of-deceleration-of-north-tower-s-upper-section-proves-use-of-explosives>

I have been following the physics of 9/11 closely over the years because my good friend, Emeritus Professor of Physics from BYU, Steven E. Jones, was one of the earliest whistle blowers on this horrendous atrocity. I was asked to be one of the peer reviewers on his ground-breaking paper showing direct evidence of controlled demolition taking down the three world trade center buildings. You will see a link to this paper later in this write up.

1. All three buildings fell at near free-fall acceleration velocities. The 47 stories of Building 7 fell into their own footprint in 6.5 seconds. This time matches controlled demolition, and the twin towers closely followed the gravitational acceleration equation as well: $s = \frac{1}{2}gt^2$, where “s” is the free-fall distance, “g” is the gravitational acceleration, and “t” is the time of free-fall. The velocity increases as $v = gt$. The gravitational acceleration experiment is a high-school physics experiment. The world observed it – not knowing it – with the controlled demolition of these three world trade center buildings falling as they did.

2. All three buildings fell into their footprint – as would happen in controlled demolition.

3. The government and media explanation for the buildings being destroyed by the impact of the airplanes, the jet fuel fires and office fires in Building 7 defies the fundamental laws of physics.

4. The temperatures from jet-fuel fires and office fires are way too low and insufficient in extent to have caused **ALL** the steel girders to collapse all at once as was observed.

5. Typical controlled demolition expanding dust clouds were observed on all three buildings.

6. Squibs (horizontal, outward explosions) seen in advance of the collapsing portion – typical of controlled demolition. Fragments of human bones were found on roofs of adjacent buildings. This could not happen from internal fires as the supposed cause of the buildings collapsing.

7. The over one hundred first responders, who survived the attack, reported series of explosions.

8. Thermite and nanothermite (red-gray chips) found in the dust of all three buildings at 0.1 % concentration levels – as used in high tech-controlled demolition. This is direct evidence of how the buildings were brought down and an excellent peer reviewed paper documents these findings. The full paper can be found at the following web address: <https://benthamopen.com/contents/pdf/TOCPJ/TOCPJ-2-7.pdf>. It was a privilege for me to be part of the peer review team on this ground-breaking paper.

9. The occurrence of iron (not steel) micro-spheres were found in the dust, which could only happen under super high temperatures (like in thermitic reactions) could not be generated from building fires or jet fuel alone melting steel; these iron micro-spheres occur in controlled demolition using thermite.

10. Several tons of molten metal at the base of the three buildings were reported by numerous highly-qualified witnesses – consistent with a nanothermite controlled demolition and not explainable from the fires present.

11. Thermitic reactions have their own oxygen as part of the chemical reaction and cannot be put out with water. These extremely hot metal pools were observed even after the following Christmas.

12. This liquid iron in the wreckage months after the collapse (from continued thermite reactions) cannot be explained from the impact of the jets and the resulting jet-fuel fires and office fires.

13. The fact that never before or since has a fire caused even one steel structure building to fall in the free fall-fashion observed – let alone three in one day.

14. The fact that the buildings had recently undergone elevator upgrades, gave access to the support structures.

15. The fact that emergency evacuations were conducted just a few days prior to 9/11 in which security cameras were disabled (providing un-documentable access).

16. The owner of WTC building 7 – the 3rd building to collapse on 9/11 – even though it was NOT hit by a plane at all (Larry Silverstein) was videotaped saying, "pull it" (the phraseology used in demolishing a building), and he made enormous profits as a result of the 9/11 disaster; his multi-billion dollar insurance was updated to cover terrorist attacks just six weeks before 9/11.

17. Cover-ups on the part of leading elite officials have been well documented in several books. The work of Emeritus Professor Peter Dale Scott of UC Berkeley in his book, *The Road to 9/11*, is an outstanding example.

18. As of 26 December 2019, we have the petition signed by 3,235 architectural and engineering professionals, who have studied the evidence and cannot agree with the government's and media's story. In addition, the petition has been signed

by 24,735 other supporters including A&E students demanding of Congress a truly independent investigation. The petition is open to everyone, as 9/11 has impacted the world in a major way: <https://www.ae911truth.org/> and the effects of the deceit have been enormous. Perhaps this “Grand Jury” will bring out the desired results for America to heal from this horrible event.

19. Seismology experts have monitored the events around 9/11 and observed significant anomalies, which cannot be explained by the government’s and media’s stories. One explosion occurred 17 seconds before.

20. One of the twin tower antennas started to fall before the building fell indicating the melting of the center core of the tower.

21. After the airplane hit the south tower, the building above the impact started to tilt over and its angular momentum would have it fall across the street destroying many other buildings, but just then the top disintegrated and fell down in its footprint – preventing this toppling and completing the controlled demolition, as it fell into its own footprint.

22. The government officials involved and the media contradicted themselves on several occasions during the coverup. For example, the media made the enormous faux-pas of saying Building-7 fell before it happened.

In September 2006, Professor Steven Jones presented some of his findings from his 9/11 research at BYU. Because of the politically incorrect nature of his results, BYU forced Steve into early retirement. Later, in an apologetic manner, they granted him – most appropriately -- Emeritus status. Steve has written a book documenting his experiences: <https://www.amazon.com/Research-Professor-Physics-Exiled-Steven-ebook/dp/B07X13S763>

The following January 2007, Elder Boyd K. Packer, President of the Twelve Apostles for the Church of Jesus Christ of Latter-day Saints, gave a most appropriate talk at BYU: <https://speeches.byu.edu/talks/boyd-k-packer/lehis-dream/> . And I quote from his talk:

Moroni warned us that the secret combinations... “are had among all people. ...

“Wherefore, O ye Gentiles [and the term Gentile in that place in the Book of Mormon refers to us in our generation], it is wisdom in God that these things should be shown unto you, that thereby ye may repent of your sins, and suffer not that these murderous combinations shall get above you. ...

“Wherefore, the Lord commandeth you, when ye shall see these things come among you that ye shall awake to a sense of your awful situation, because of this secret combination which shall be among you” ([Ether 8:20, 23–24](#)).

Atheists and agnostics make nonbelief their religion and today organize in unprecedented ways to attack faith and belief. They are now organized, and they pursue political power. You will be hearing much about them and from them. Much of their attack is indirect in mocking the faithful, in mocking religion...

You who are young will see many things that will try your courage and test your faith. All of the mocking does not come from outside of the Church. Let me say that again: all of the mocking does not come from outside of the Church. Be careful that you do not fall into the category of mocking.

Only a few months later Dick Cheney, then Vice President of the United States, invited himself to give the commencement address at BYU and was given an honorary doctorate. Yet Cheney has been documented as one of the insiders. There were those who were calling for his impeachment, because they knew of his involvement with 9/11. How appropriate a warning has President Packer given us? https://www.patriotsaints.com/News/911/Conspiracy/Mormons_Silence_Cheneys_Dissent/index.html

I hope and pray for a great healing for this “Land of the free.” This is the “Promised Land” and the place of the New Jerusalem. From here the gospel is to go to all nations. How can we share it if we are not living it? The need for America to repent is paramount! <https://itsabouttimebook.com/americasgreatestneedrepentance/> The glorious promise is that if we will do so, we can be part of the Bride to meet the Bridegroom at His Coming in preparation for Him to enter into His glorious millennial reign as King of kings and Lord of lords.
